

Kudos colour test

MEDIA TYPE / QUALITY / DATE — fill this in before you print

Print exactly as a card: A5 landscape borderless, 100% / Actual size, the same quality setting. One sheet per media type you are trying, labelled above.

Neutral greys

read these first — every one is a true grey, so any colour you can see was added by the printer

Saturated

the gamut edge, where media types differ most

Skin

what a recipient looks at, and what a small cast ruins first

Sweep

look for steps or stripes — that is the quality setting, not the paper

heaviest ink — check for cocking, and for transfer when you turn the stack
